

## Statement of Verification

BREG EN EPD No.: 000392 Issue 02

This is to verify that the

**Environmental Product Declaration** provided by:

CCL Scandinavia A/S

is in accordance with the requirements of:

EN 15804:2012+A1:2013

BRE Global Scheme Document SD207

This declaration is for:

1 kilogram of CE-marked Corrugated Duct according to EN 523 "Steel strip sheats for prestressing tendons", Category 1 and Category 2

# **Company Address**

Ny Vestergårdsvej 11 DK 3500 Værløse Denmark

23 November 2021

29 March 2022

22 November 2026

Expiry Date

This Statement of Verification is issued subject to terms and conditions (for details visit www.greenbooklive.com/terms.

To check the validity of this statement of verification please, visit www.greenbooklive.com/check or contact us.

a: Product category rules b: Optional for business-to-business communication; mandatory	for business-to-consumer communication (see EN ISO 14025:2010, 9.4)					

Environmental product declarations from different programmes may not be comparable if not compliant with EN 15804:2012+A1:2013. Comparability is further dependent on the specific product category rules, system boundaries and allocations, and background data sources. See Clause 5.3 of EN 15804:2012+A1:2013 for further guidance

Comparability

#### **Construction Product**

#### **Product Description**

This LCA covers corrugated steel ducts. Corrugated steel ducts are used in bonded post-tensioning and precast concrete elements and can also be used to create recesses.

All standard ducts are manufactured in accordance with the harmonized standard EN523 and are CE-marked, as per EU building materials regulations. The Declaration of Performance for standard ducts can be downloaded from the website.

Ducts are available in a range of sizes and types where:

- Type BR are ducts according to EN523 Category 1.
- Type BRM are ducts according to EN 523 Category 1 working as couplers.
- Type KR are ducts according to EN523 Category 2.
- Type KRM are ducts according to EN 523 Category 2 working as couplers.

Description: Ø inside / Weight (Functional unit):						
BR range	Ø 30 mm / 0,41 kg per meter - Ø 130 mm / 2,20 kg per meter					
KR range	Ø 80 mm / 1,42 kg per meter - Ø 130 mm / 2,70 kg per meter					

Standard dimensions and weights according to product specification.

Other diameters can be manufactured on request.

This is an average EPD covering all corrugated ducts produced over the course of 1 year

#### **Technical Information**

Type BR:

Essential characteristics	Document	Standard
Material thickness	Declaration of Performance, B-07-30-03-E	EN 523 Category 1
Water tightness	Declaration of Performance, B-07-30-03-E	EN 523 Category 1, EN 524-6
Flexural behaviour	Declaration of Performance, B-07-30-03-E	EN 523 Category 1, EN 524-2
Lateral load resistance	Declaration of Performance, B-07-30-03-E	EN 523 Category 1, EN 524-4
Tensile load resistance	Declaration of Performance, B-07-30-03-E	EN 523 Category 1, EN 524-5
Length, diameter, relative volume and weight	Product Specification, B-07-30-06-E	EN 523 Category 1, EN524-1

#### Type KR:

Essential characteristics	Document	Standard
Material thickness	Declaration of Performance, B-07-30-04-E	EN 523 Category 2
Water tightness	Declaration of Performance, B-07-30-04-E	EN 523 Category 2, EN 524-6
Flexural behaviour	Declaration of Performance, B-07-30-04-E	EN 523 Category 2, EN 524-2
Lateral load resistance	Declaration of Performance, B-07-30-04-E	EN 523 Category 2, EN 524-4
Tensile load resistance	Declaration of Performance, B-07-30-04-E	EN 523 Category 2, EN 524-5
Length, diameter, relative volume and weight	Product Specification, B-07-30-07-E	EN 523 Category 2, EN 524-1

#### **Main Product Content**

Material/Chemical Input	%
Steel	100%

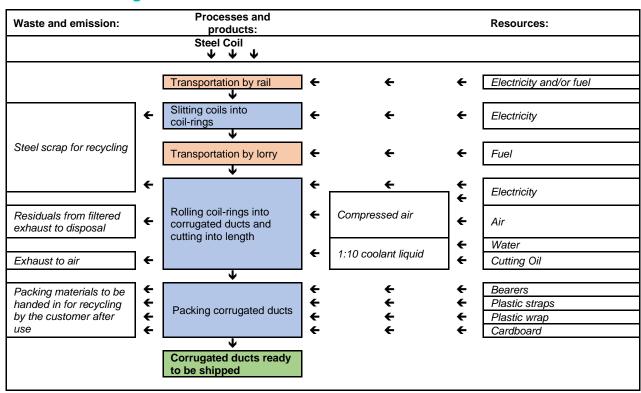

Material composition of all products assessed within this average EPD

#### **Manufacturing Process**

The input material is cold rolled Steel Coils. Coils are transported to a third party for slitting into coil rings which are then transported to the manufacturer where they are rolled into ducts, cut to length and packed.

### **Process flow diagram**

## **Life Cycle Assessment Calculation Rules**

### **Declared unit description**

1 kg of corrugated duct as used in precast and post tensioning concrete

#### System boundary

This is a cradle to gate EPD, reporting all production life cycle stages of modules from A1 to A3 inclusive in accordance with EN 15804:2012+A1:2013.

#### Data sources, quality and allocation

Data collected by the manufacturer for the production of corrugated ducts for the period 1st January 2020 to 31st December 2020 has been used for this EPD.

The manufacturing site is a combination of a manufacturing unit and a maintenance and repair shop. Electricity consumption was determined by measuring the consumption on the manufacturing unit for different representative dimensions (types) of the products. The measurements have been carried out by an authorized company. The specific power consumptions for the remaining dimensions (types) of the products is calculated using interpolation.

The consumption of water is calculated based on the factual consumption.

Figures for the raw materials, ancillary materials and packaging were from actual usages. Allocation of energy, water, and waste has been done according to the provisions of the BRE PCR PN514 and EN 15804. Secondary data has been drawn from the steel manufacturer's EPD for cold rolled steel coils and the BRE LINA database v2.0.83. The background LCI datasets are based on ecoinvent v3.2 (2015) which was used for all other material energy and waste data requirements.

#### **Cut-off criteria**

All inputs or outputs have been included and all raw materials, packaging and transport, energy, water use and wastes, are included, except for direct emissions to air, water and soil, which are not measured. Upstream extraction and/or processing of inputs are included within the use of the background datasets within LINA.

#### **LCA Results**

(MND = module not declared; MNR = module not relevant; INA = indicator not assessed; AGG = aggregated)
